

RUTV SONI

Computer Engineer Student

+91 7861908979 | ✉ rutvsoni2006@gmail.com | 📍 Ahmedabad, Gujarat | 🔗 [Linkedin](#) | 🐙 [GitHub](#)

SUMMARY

Aspiring Backend Developer with knowledge of Python, Flask, SQL, HTML, and CSS. Developed projects that strengthened programming, database management, and problem-solving skills. Along with backend development, I have experience working on data analysis projects using Python and Excel. Looking for an opportunity to apply my technical skills and gain hands-on industry experience.

EDUCATION

Bachelor of Engineering in Computer Engineering

LDRP Institute of Technology and Research

Current Semester :- 7th

EXPERIENCE

Web Development Intern

Inamigos Foundation

Founded with a mission to create awareness about various social issues.

- Worked on NGO awareness webpage development using HTML and CSS
- Assisted in improving webpage structure and content presentation
- 2 week internship in Inamigos Foundation

CERTIFICATIONS

TCS iON Career Edge – Young Professional

Completed training in Communication Skills, Interview Skills, Business Etiquette, Effective Email Writing, IT Foundation Skills, and Artificial Intelligence Fundamentals

Java Course – Mastering the Fundamentals | Scaler Topics

Successfully completed a Java programming course covering core concepts, OOP principles, and problem-solving techniques. Strengthened programming fundamentals through tutorials, modules, and coding challenges.

Web Development Course

Successfully completed a Web Development course covering HTML, CSS, Python, MySQL, and website development fundamentals. Gained hands-on experience in building web applications, working with databases, and developing responsive web pages while strengthening front-end and back-end development skills.

SKILLS

Python | C/C++ | HTML | CSS

MySQL | Flask | Numpy | Java

Microsoft Excel | Power Query

Power Pivot | Data Structure

Matplotlib | Pandas

PROJECTS

Restaurant Sales Analysis using Python

- Analyzed restaurant sales dataset using Python to identify sales trends and customer behavior
- Performed data cleaning, grouping, and analysis using pandas
- Created visualizations such as bar charts, pie charts, and line graphs using matplotlib
- Identified insights including higher revenue during dinner hours and customer spending patterns across different days

Netflix Data Analysis

- Working on analysis of Netflix dataset to identify content trends and viewer patterns
- Performing data cleaning and visualization using Python libraries
- Building insights related to genres, ratings, release years, and content distribution

Student Management System (Flask & MySQL)

- Built a Student Management System to streamline student data management and record keeping
- Developed CRUD functionalities for adding, editing, deleting, and viewing student records using Flask and MySQL
- Created responsive web pages and connected backend database operations to ensure efficient data handling
